

We are hiring for our team in Tübingen at the **earliest date possible**:

INTERN BUSINESS SIMULATIONS MODELING (M/F/D)

ABOUT US:

TOPSIM GmbH, a company of MPS Limited, is the global partner for interactive and computer-aided management and business simulations for personnel and organisational development. With our 20 employees at Tübingen, we have developed a large number of simulation models with different business management focuses for different sectors and target groups in industry and academia. They offer a wide range of opportunities, for example in employee and management training, recruiting, communication and strategy. Our customers include many of the world's most successful companies and renowned educational institutions. Over 70 percent of DAX companies and over 300 universities use our business simulations.

WHY WORK FOR TOPSIM:

- ▶ A dynamic, multidisciplinary and multicultural team
- ▶ Projects with a high degree of independence, personal responsibility
- ▶ Direct cooperation with leading companies and renowned universities
- ▶ Challenging and exciting projects in various industries and customer segments worldwide
- ▶ Flat hierarchies, agility and a self-organized way of working
- ▶ Flexible working hours & home office
- ▶ Free meals: coffee, tea, water and fruit

YOUR TASKS:

You develop business simulations together in small project teams

- ▶ You create models based on economic, business and accounting practices and theory
- ▶ Together with the client you develop the learning goals and contents
- ▶ You break down reality into simplified cause-effect relationships and translate these into a mathematical and economic model
- ▶ You develop processes based on applied economic theories, from the demand effect to the macro-economic inputs via scenarios and story
- ▶ With your business and economics know-how and creativity, you bring in ideas that contribute to the further development of our products and solutions

YOUR PROFILE:

- ▶ You are studying economics, business administration, industrial engineering or in a field related to finance / math modeling.
- ▶ You have a good understanding of business and economic models based on economic theory and accounting.
- ▶ You have a high level of abstraction and can keep track of complicated models.
- ▶ You are enthusiastic to apply concepts of microeconomic, game theory, accounting, business administration, teaching and learning approaches in simulations aimed at higher education and on-the-job training
- ▶ You want to create models and simulations and develop innovative solutions for business skills transfer
- ▶ You have good excel skills, excellent analytical and problem-solving skills as well as ideally first coding knowledge.
- ▶ You work independently as well as in a team, are strong in communication and authentic in everything you do.
- ▶ You have very good written and spoken English and ideally also German skills.
